

ACER

 Agency for the Cooperation
of Energy Regulators

**List of organised market places
and
List of standard contracts**

Sigrid Colnerud Granström
Market Monitoring Department

**9th Public workshop on REMIT implementation
Ljubljana, 10 December 2014**

*“In order to facilitate reporting, the Agency shall draw up and publish a public **list of organised market places** upon entry into force of this regulation. The Agency shall update that list in a timely manner.”*

Article 3(2) of the Implementing Acts

The purpose of the list is to enable identification of organised market places for the purpose of transaction reporting under Article 6(1)

- The list is built on the following information on the organised market places

Type of organised market place	Full name of organised market place	Organised market place ID	Country code

- Open call to register as an organised market place during October

- Public consultation on a provisional list now open – deadline 11 December

- Publication of the list of organised market places upon entry into force of the IAs

*“In order to facilitate reporting, the Agency shall draw up and maintain a public **list of standard contracts** and update that list in a timely manner.*

In order to assist the Agency to comply with its obligations, organised market places shall submit identifying reference data for each wholesale energy product they admit to trading to the Agency. The information shall be submitted before trading commences in that particular contract in a format defined by the Agency. Organised markets shall submit updates of the information as changes occur”

Article 3(2) of the Implementing Acts

The purpose of the list is to specify the contract types for which the standard reporting form is applicable

All non-listed contract types which do not have the characteristics of the standard contracts will be considered non-standard and shall be reported using the non-standard reporting form

- ACER collects reference data on standard contract types from organised market places

- ACER publishes the List of standard contracts three months after the entry into force of the IA

- The List of standard contracts works as a tool for distinguishing between standard and non-standard reporting
