

ACER

Agency for the Cooperation
of Energy Regulators

Stakeholder event

***Methodologies and parameters used to
determine the allowed or target revenue of
TSOs***

**ACER Gas department
Brussels, 8 February 2018**

There are two articles in the NC TAR about increasing transparency on the TSO revenues:

1. **Article 30:** the NRA or TSO needs to publish information before the tariff period
 - » Focusses on values;
 - » To be checked as part of ACER's monitoring work, ENTSOG shall submit information on publication requirements by 31 March 2018.
2. **Article 34:** ACER needs to publish a report on the methodologies and parameters used to determine the allowed/target revenue of gas TSOs
 - » Refers to [Article 30](#);
 - » Focusses on description;
 - » ACER contracted ECA.

Article 34 is not explicit about the aim of the report.

- ACER aims to provide an overview of the methodologies currently in place,
- and make an intelligent analysis, providing more insight into the setting of the revenues.
- So, that the report provides learnings to stakeholders.
- ACER also aims to harmonise terminology.

The report will not:

- Point at winners and losers or
- Provide a (cost) benchmark

Purpose of this event:

- ECA to provide an overview of the work so far
- Get input from stakeholders on the scope of the report:
 - » What do stakeholders want to get out of this study?
 - » Which parameters are of most importance?
 - » What works well and what could be improved?
- Discuss initial thoughts on the conceptual framework.

Thank you for your attention!
